

UNIVERSITY OF AMSTERDAM

**Opportunities for access to the
Zoological Museum Amsterdam**

&

Expert Center For Taxonomic Identification

The University of Amsterdam offers financial support for access to the Zoological Museum Amsterdam (ZMA) and the Expert Center for Taxonomic Identification (ETI). The programme and facilities of ZMA and ETI are based on their extensive zoological collections and information technology. Access to these facilities is supported by the European Commission as a Large-Scale-Facility grant under the programme "Training and Mobility of Researchers".

Applications for access are encouraged from scientists from EU countries or associated countries (Iceland, Liechtenstein, Norway, Israel). Proposals that can be completed within a short visit (typically one - two weeks), not exceeding two months, will be considered. Financial support that will cover travel, subsistence, access and assistance will be available for accepted proposals. Additional financial support is available for personal instruction and training.

Applications for support should be made by completing an application form. There are two proposal rounds each year with closing dates of 1 June and 1 December. All applications will be subject to a review procedure by a selection committee.

More information and the application form can be requested by sending a message to Dr. H. Nijssen (P.O. Box 94766, NL-1090 GT Amsterdam, fax: +31.20.525.5402, e-mail: nijssen@bio.uva.nl).
