<i>P. tricornis?</i> (v. Smenov)		×			×	×	
<i>P. waldschmidtii</i> (Paeck.)		×			×	×	
PISCES		×					

¹⁾ The fauna from loc. W1162 has been provisionally described by Wagner (1963, p. 54). The data for comparison are from the works of Paeckelmann (1930, 1931), Gallwitz, (1932) and Nicolaus (1963).

²⁾ *Leptaenisca culmica* Nicolaus, 1963 certainly does not belong to the genus *Leptaenisca*, as defined in the Treatise (Muir-Wood & Williams, 1965, p.H391), and is here provisionally assigned to the genus *Irboskites*. Johnson (1967) convincingly showed that the genus *Irboskites* should be placed in the family Strophalosiidae of the suborder Productidina, notwithstanding its lack of spines. It is also less strange that a Lower Carboniferous species would belong to an Upper Devonian genus, than to the Lower Devonian genus *Leptaenisca*.

³ The trilobites have been identified by Dr. G. Hahn (pers. com.).

⁴ The corals have been identified by Dr. G. E. de Groot (pers. com.).

⁵ The cephalopods have been identified by Dr. J. Kullmann (1962, 1963; pers. com.). The fossils from literature (Wagner-Gentis, 1963) are marked with a plus sign.

 Fig. 15. Pedicle valve. D. 1, $\times 1$, same loc. 15a posterior view; 15b anterior view.
 Fig. 16. Pedicle valve. Br. L 1033, $\times 2\frac{1}{2}$, same loc.
 Fig. 17. Decorticated interior of a pedicle valve. WP. 16401, $\times 4$, loc. 3, Valdeteja Mbr.
 Fig. 18. Exterior mould of a brachial valve with some shell remains. Br. L 1055, $\times 1\frac{1}{2}$
 loc. 35, Valdeteja Mbr.
 Fig. 19. Pedicle valve. Br. L 1001, $\times 1$, same loc.
 Fig. 20a. Incomplete mould of the interior of a brachial valve with the umbo of the pedicle
 valve. Br. L 1038A, $\times 3$, same loc.
 Fig. 20b. Incomplete interior of a brachial valve with remains of the trail of the pedicle
 valve. Br. L 1038B, $\times 2$, same loc.
- Figs. 21, 22. *Avonia (Quasiavonia) echidniformis* (Chao) p. 78
 Fig. 21. Incomplete mould of the interior of a pedicle valve. Br. M 821, $\times 2$, loc. M8, Esca-
 lada Fm.
 Fig. 22. Mould of the exterior of a pedicle valve. Br. 1602, $\times 1$, loc. 50, Sicra Corisa Mbr.
- Figs. 23, 24. *Krotovia spinulosa* (Sowerby) p. 79
 Fig. 23. Incomplete pedicle valve with a part of the brachial valve interior. WP. 13101, \times
 $1\frac{1}{2}$, loc. 10, Valdeteja Mbr.
 Fig. 24. Mould of the exterior of a brachial valve. WP 13104, $\times 1$, same loc.
- Figs. 25-30. *Krotovia granulosa* (Phillips) p. 80
 Fig. 25. Brachial valve interior. Sc. 101, $\times 1$, San Emiliano Fm.
 Fig. 26. Incomplete pedicle valve. Wa. 32301, $\times 1$, loc. 54, Perapertú Fm. 26a ventral view;
 26b lateral view.
 Fig. 27. Incomplete pedicle valve. WP. 34903, $\times 1$, loc. 24, San Emiliano Fm. 27a ventral
 view; 27b lateral view.
 Fig. 28. Exterior mould of a brachial valve. WP. 36501, $\times 1$, loc. 30, San Emiliano Fm.
 Fig. 29. Pedicle valve, posterior view. WP. 33902, $\times 1$, loc. 25', San Emiliano Fm.
 Fig. 30. Exterior mould of a brachial valve. Wa. 32305, $\times 1\frac{3}{4}$, loc. 54, Perapertú Fm.

PLATE II

- Figs. 1, 2. *Eomarginifera praecursor* (Muir-Wood) p. 83
 Fig. 1. Decorticated specimen with a V-shaped antero-median extension. Br. L 1260, $\times 3\frac{1}{2}$, loc. 35, Valdeteja Mbr. 1a lateral view of the pedicle valve; 1b anterior view of the pedicle valve; 1c dorsal view showing the brachial valve with a broad marginal rim.
 Fig. 2. Pedicle valve of a more geniculated specimen, lateral view, D. 13, $\times 3\frac{1}{2}$, same loc.
- Figs. 3-6. *Eomarginifera lobata* (Sowerby) p. 83
 Fig. 3. Pedicle valve showing the 8 halteroid spines and several small spines. Sc. 121, loc. 21, San Emiliano Fm. 3a posterior view, $\times 1\frac{1}{4}$; 3b anterior view, $\times 1$.
 Fig. 4. Pedicle valve. WP. 32802, $\times 1\frac{1}{4}$, same loc.
 Fig. 5. Pedicle valve. Sc. 123, $\times 1$, same loc. 5a posterior view; 5b anterior view.
 Fig. 6. Pedicle valve with an extremely deep median sulcus. WP. 32801, $\times 1$, same loc. 6a anterior view; 6b posterior view.
- Figs. 7, 8. *Eomarginifera setosa* (Phillips) p. 84
 Fig. 7. Interior of a brachial valve. WP. 14101, $\times 1\frac{1}{4}$, loc. 10', Valdeteja Mbr.
 Fig. 8. Interior of a brachial valve. WP. 14102, $\times 2$, same loc.
- Figs. 9-13. *Alitaria frechi* (Paeckelmann) p. 81
 Fig. 9. Mould of the interior of a pedicle valve with the shell posteriorly preserved. Wa. 32320, $\times 2\frac{1}{2}$, loc. 54, Perapertú Fm. 9a posterior view; 9b anterior view.
 Fig. 10. Decorticated pedicle valve showing the "cincture" on the decorticated part but not on the right-hand side where the shell is preserved. Br. L 1204, loc. 35, Valdeteja Mbr. 10a lateral view, $\times 2$; 10b anterior view, $\times 2$; 10c posterior view, $\times 2\frac{1}{2}$.
 Fig. 11. Pedicle valve with a distinct triangular outline showing the two diverging halteroid spines at the hinge and the marginal rim. Br. L 1223, $\times 1\frac{1}{4}$, same loc. Uncoated with ammonium chloride.
 Fig. 12. Interior mould of the brachial valve showing the crenulated marginal ridge curving along the interior side of the ears, as well as other internal features. Br. L 1247, $\times 1\frac{1}{4}$, same loc. Uncoated with ammonium chloride.
 Fig. 13. Mould of the exterior of a brachial valve. Br. L 1202, $\times 2\frac{1}{4}$, same loc.
- Figs. 14-19. *Alitaria nasuta* (Paeckelmann) p. 82
 Fig. 14. Pedicle valve showing the cincture and the antero-median fold, anterior view. WP. 32862, $\times 1$, loc. 21, San Emiliano Fm.
 Fig. 15. Pedicle valve, WP. 32865, $\times 1$, same loc.
 Fig. 16. Pedicle valve, posterior view. WP. 32863, $\times 1\frac{1}{2}$, same loc.
 Fig. 17. Pedicle valve, posterior view. WP. 36522, $\times 1$, same loc.
 Fig. 18. Exterior mould of a brachial valve. WP. 32866, $\times 1$, same loc.
 Fig. 19. Pedicle valve, anterior view, WP. 32864, $\times 1$, same loc.
- Figs. 20, 21. *Kozlowskia aberbaidenensis* (Ramsbottom) p. 85
 Fig. 20. A transverse specimen. Si. P 825, $\times 2\frac{1}{2}$, loc. 40, Pando Fm. 20a mould of the interior of the pedicle valve, posterior view; 20b interior mould of the pedicle valve, anterior view; 20c interior mould of the brachial valve showing a rim around the visceral disc.
 Fig. 21. Mould of the interior of a complete specimen showing the posterior part of the pedicle valve with muscle scars and a long spine on the right and the anterior half of the brachial valve showing prominent brachial ridges and endospines. Si. P 521, $\times 1\frac{1}{2}$, same loc.

PLATE III

- Figs. 1, 2. *Kozlowskia aberbaidensis* (Ramsbottom) p. 85
- Fig. 1. A sub-quadrate specimen. Si. 1124, $\times 2\frac{1}{2}$, same loc. 1a mould of the interior of the pedicle valve, posterior view; 1b interior mould of the brachial valve; 1c exterior mould of the brachial valve showing the marginal rim and cardinal process.
- Fig. 2. Mould of the interior of a brachial valve with part of the trail preserved, antero-dorsal view. Si. 1121, $\times 2\frac{1}{2}$, same loc.
- Figs. 3-6. *Kozlowskia pusilla* (Schellwien) p. 86
- Fig. 3. Incomplete mould of the interior of a pedicle valve showing the halteroid spines, posterior view. Si. M 101, $\times 1\frac{1}{2}$, same loc.

- Fig. 11. Incomplete pedicle valve. Br. M 711, $\times 3\frac{1}{2}$, loc. M 7, Escalada Fm.
- Fig. 12. *Fluctuaria undata* (Defrance) p. 110
- Pedicle valve. Ra. 17, $\times 1$, loc. 10?, Valdeteja Mbr. 12a posterior view; 12b antero-lateral view.
- Fig. 13. *Proboscidea proboscidea* (de Verneuil) p. 111
- Incomplete specimen. dG. 511, $\times 2$, loc. 54, Perapertú Fm. 13a pedicle valve, lateral view; 13b postero-ventral view showing the pedicle valve and anterior part of the brachial valve.
- Fig. 14. *Proboscidea* sp. p. 111
- Pedicle valve. Ka. 7142, $\times 1$, loc. 42, Cervera Fm.

PLATE IX

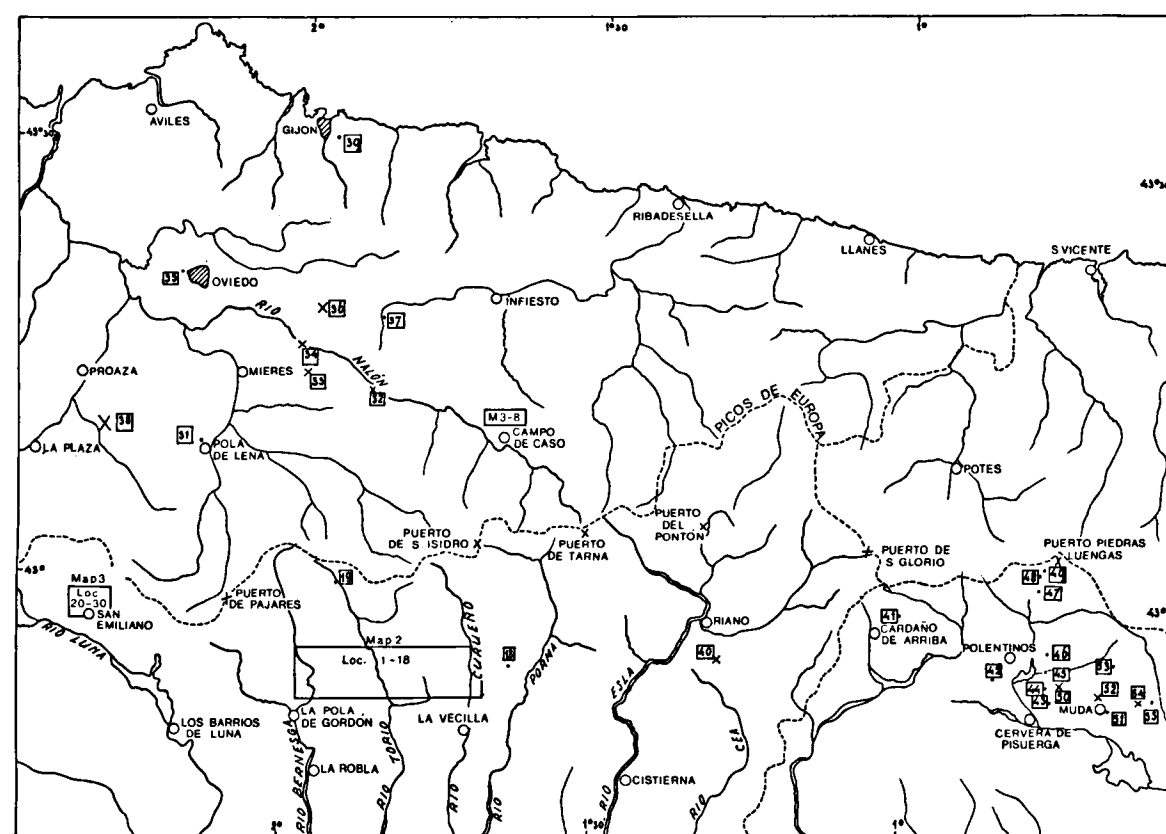

- Figs. 1, 2. *Plicochonetes waldschmidti* Paeckelmann p. 118
 Fig. 1. Mould of the interior of a pedicle valve. WP. 014250, $\times 20$, loc. W 1162, Vegamián Fm.
 Fig. 2. Interior mould of a brachial valve showing the large diverging septa, alveolus and socket ridges. WP. 014230, $\times 20$, same loc.
- Figs. 3, 4. *Plicochonetes kayserianus* Gallwitz p. 117
 Fig. 3. Mould of the exterior of a brachial valve. WP. 014263, $\times 5$, same loc.
 Fig. 4. Mould of the exterior of a pedicle valve with the exterior mould of a small brachial valve of *P. waldschmidti* adhering. WP. 014272, $\times 5$, same loc.
- Fig. 5. *Rugosochonetes laguessianus angustus* (Paeckelmann) p. 115
 Interior mould of a pedicle valve. WP. 014305, $\times 12\frac{1}{2}$, same loc.
- Fig. 6, 7. *Rugosochonetes skipseyi* (Currie) p. 115
 Fig. 6. Mould of a brachial valve exterior and a small part of the pedicle valve interior showing a row of spines along the hinge. Br. M 857, $\times 5$, loc. M 8, Escalada Fm.
 Fig. 7. Interior mould of a pedicle valve showing the median septum and the spine canals in the area. The median sulcus is shown exaggerated. Bl. 49230, $\times 3\frac{1}{2}$, loc. 37, Calizas Inferiores Mbr.
- Fig. 8. *Rugosochonetes acutus* (Demanet) p. 114
 8a Incomplete exterior mould of a brachial valve. Br. M 851B, $\times 2\frac{1}{2}$, loc. M 8, Escalada Fm.;
 8b Interior mould of the same brachial valve. Br. M 851A, idem.
- Figs. 9, 10. *Chonetinella flemingi crassiradiata* (Dunbar & Condra) p. 119
 Fig. 9. Incomplete pedicle valve. WP. 33301, $\times 7$, loc. 28, San Emiliano Fm.
 Fig. 10. Incomplete interior mould of a pedicle valve. WP. 33850, $\times 6\frac{1}{2}$, loc. 20, San Emiliano Fm.
- Figs. 11-16, 18. *Neochonetes acanthophorus* (Girty) p. 119
 Fig. 11. Pedicle valve. WP. 33808, $\times 2\frac{3}{4}$, same loc.
 Fig. 12. Pedicle valve. WP. 33806, $\times 2\frac{3}{4}$, same loc.
 Fig. 13. Pedicle valve. WP. 33803, $\times 2\frac{1}{2}$, same loc.
 Figures 11-13 are not whitened with ammonium chloride to show the lamellose surface and the spinule apertures as white bands and spots, respectively.
- Fig. 14. Brachial valve and interarea of the pedicle valve showing the reflexed interarea and the cardinal process. WP. 33817, $\times 2\frac{1}{4}$, same loc.
- Fig. 15. Brachial valve showing spinule apertures. Note also the crushing of the brachial valves in this and the foregoing figure. WP. 33805, $\times 3$, same loc.
- Fig. 16. Interior of a fragmentary pedicle valve showing the papillae, the median septum and the vascular trunks. WP. 33840, $\times 3$, same loc.
- Fig. 18. Interior mould of a pedicle valve. Wa. R 97, $\times 2\frac{1}{2}$, Lena Fm. 18a posterior view; 18b anterior view.
- Fig. 17. *Lissochonetes? obtusus* (Schellwien) p. 116
 Decorticated interior of a brachial valve showing the socket ridges, the teeth of the pedicle valve and a weak radial lineation of the surface. Wa. 7529, $\times 2\frac{1}{2}$, loc. 46, Verdiana Lst. Mbr.
- Fig. 19. *Mesolobus sinuosus* (Schellwien) p. 116
 Pedicle valve. Br. 2101, $\times 2\frac{1}{2}$, unknown loc., probably Cristobál Fm. or else Corisa Fm.
