H o r n a f R a n t z i e n, Dr. Henning

The wellknown specialist of water plants and fossil Characeae, of the Stockholm Museum, died by very bad luck in a quarry in France, Sept.1960, while sampling petrificates. We readily support the initiative to erect a memorial in his honour, and to place any surplus money deriving from the subscription to Mrs Horn's disposal (Taxon 10, Febr.1960, 60). Contributions may be sent under the designations "Henning Horns minne" to Department of Geology, Kungstensgatan 45, Stockholm Va, directly or by postal cheque 35 87 87.
