

XI. DATES OF PUBLICATION AND BIBLIOGRAPHICAL NOTES  
(cntd from p.363)

As most of our readers who generally will have at hand a copy of the Flora Malesiana will have seen, the last part of volume 4 contains a most valuable list compiled by Mrs M.J. van Steenis - Kruseman and Mr W.T. Stearn on "Dates of Publication". Though aiming primarily for use of Flora Malesiana it is not limited to works dealing with the Malaysian region only but included all works which have come to our knowledge of which more precise data could be given than Pritzel gave eighty years ago. We are certain that quite a number of data have escaped our attention and we have also put forward that there is apparently no end to attain in this matter. It is for this reason that we continue this bibliographical information.--Ed.

Bentley, R. & H. Trimmen, Medicinal plants.

Cf. B.L. Burtt, Not. Roy. Bot. Gard. Edinb. 21 (1953) 157-162.

The work is usually referred to as a 4-volume work published in 1880. From a set in parts, in original wrappers, in the library of the Royal Botanic Garden, Edinburgh, it appeared that the work was issued in 42 parts from 1875-1880. The plates were not issued in numerical order. The full list of contents of each part and the dates of issue are listed in Burtt's paper.

Blume, C.L., Tabellen en platen voor de Javaanse Orchideen. Batavia, 1825.

Cf. R. Mansfeld in Fedde, Rep. 39 (1936) 318.

Most copies of this work end with tab. 15 fig. 73. In 1928 the Botanical Museum at Berlin-Dahlem acquired a copy with 16 tab. containing 78 fig.

The following plants are depicted on t. 16: fig.74 Callostylis rigida, fig.75 Thelasis carinata, fig.76 Spathoglottis plicata, fig.77 Aphyllorchis pallida, fig.78 Rhynchanthera paniculata.

A photocopy of tab.16 was presented to the Kew Library, to Leyden, and possibly other libraries.

Miquel, F.A.W., c.s., Annales Musei botanici Lugduno-Batavi.

Unbound copies of the stock of this work in the Rijks-herbarium proved Beumée's dates, cited in Fl. Mal. I, 4<sup>3</sup> (1954) ccii to be the right ones for vol. 4: - fasc. 1-3, pp. 1-96, are dated 1868, fasc. 4-10, pp. 97-319 are dated 1869.

From the announcement on the back of the wrappers it appears that the work was planned to be published in fascicles

of 8 sheets (32 pp.) of letterpress accompanied by one plate (coloured or not). Every year 5 fascicles were to appear, and actually appeared up to vol. 3, which was wholly published in 1867. Of vol. 4 only 3 fascicles appeared in 1868, the 7 remaining ones in 1869.

S a i n t - H i l a i r e, A. de, Flora Brasiliae meridionalis.

Cf. Nell C. Horner, Missouri Bot. Gard. Bull. 41 (1953) 57-58.

This work was published in two editions, viz quarto with engraved plates, and folio with coloured plates, both in 3 volumes. Presumably Pritzel confused the two editions for, except for the size and the plates being coloured, his description applies to the quarto edition. It was to be published in bi-monthly issues.

It is evident from an advertisement in Hook. Lond. J. Bot. 1842 that the coloured plates were destroyed and that the folio work was already a rarity at that time.

Folio edition (copy Missouri Bot. Gard.)

<u>vol.:</u>	<u>Pages:</u>	<u>Dates:</u>
1 (1825)	1-132	end? 1824-1826
2	133-305	1827- ?
