## MALESIAN SEED PLANTS

*(advertisement)*

### Volume 1 — Spot-characters

An aid for identification of families and genera

M. M. J. van Balgooy

1997, 154 pp., richly illustrated. — ISBN 90-71236-31-5 — Price: NLG 50.00

Published by Rijksherbarium / Hortus Botanicus, Leiden

- This is the first volume of a three-volume series titled 'Malesian Seed Plants', all intended as identification tools. The Malesian region harbours an unrivalled diversity of seed plants and the present book facilitates their identification by listing families and genera with easily spotted features. Each of these 105 spot-characters is defined and illustrated where appropriate. The book is not only an indispensable tool for identification of Southeast Asian plants in the herbarium (and the field), but it can also be used as an important teaching aid.
