(1928-1969)of the Forest Research Institute, Canberra, perished in the same car accident which befell Dr. Prijanto, end April 1969, above Makassar, SW. Celebes. In our Bulletin we mentioned his collecting drive of Eucalypts in Timor (p. 1685). In conjunction with this he was probably after material of *Eucalyptus deglupta* which grows in profusion in the ravines above Makassar on the way to Malino.**P r i j a n t o**, B.

One of the promising coming botanists at Bogor, died through a car accident above Makassar, SW. Celebes. He was trained at Stockholm during one year in palynology, and subsequently worked for five years at Edinburgh under Dr. Burt on problems of Scrophulariaceae. He was forest botanist of the Indonesian Forest Experiment Station, Bogor. His untimely death is a heavy blow to the Bogor Herbarium. His energetic, most pleasant personality will remain in our memory, and our sympathy goes to his young wife whom he married some months before this tragic accident.

The accident bereaved us of two other, Australian botanists who accompanied Dr. Prijanto, one of them being Mr. E. Larsen, who was hunting for *Eucalyptus*.
