22. Nyctaginaceae - STEMMERIK, April 1964.
23. Geraniaceae - CAROLIN, Sept. 1964.
24. Celastraceae - DING HOU, May 1965.

VARIA

Part of the neglect of botany in this and in other ways clearly stems also from a common ignorance of the debt owed by the community to applied botany, and this again may be in part a consequence of the undue modesty of botanists.

R.D.Preston, The future of botany
(Nature 204, 1964, 12-13).
