

Erratum

Lang M, Orgogozo V. 2012. Distinct copulation positions in *Drosophila pachea* males with symmetric or asymmetric external genitalia. *Contributions to Zoology* 81: 87-94.

The primary data of this article is now available from the Dryad Digital Repository: <http://dx.doi.org/10.5061/dryad.7jn61>.

The length of the lobes (left and right) should be divided by 2.62 throughout the paper, *i.e.* in the x- and y-axis of Fig. 2a-b and in the x-axes of Figs 3c and 4b-d.

On page 91, second column, line 45, and on page 92, first column, line 7: the time interval during which the mating angles were less variable and averaged was not ‘five to ten minutes’ but ‘four to eleven minutes’. Similarly, in the legend of Fig. 4 and in Table 1, ‘5-10 min’ should be replaced by ‘4-11 min’.

**Contributions to Zoology thanks the following reviewers
for their assistance over the 2015 calendar year:**
